EDUCATION

AKASHGLOBALCOLLEGE OF MANAGEMENT & SCIENCE — July 2023 – June 2026

Bachelor of Computer Application (Final Year) — BENGALORE, Karnataka

PROFESSIONAL SUMMARY

A passionate and results-driven Full Stack Web Developer with a strong foundation in building dynamic and responsive web applications. I have skills in both frontend and backend technologies, with a keen interest in creating scalable and user-friendly digital solutions. I am open to internships and fresher roles to enhance my learning and contribute to the real world.

TECHNICAL SKILLS

Programming Languages : JavaScript, Java, SQL, HTML, CSS Tools: Git, GitHub, VS Code, Cloudinary, Render.

Frameworks Libraries : React.js, Node.js, Express.js, MongoDB.

Other Skills : REST APIs, CRUD operations.

PROJECTS

WonderLustTravel(Airbnb-Inspired Web App) | MERN Stack

Technologies: HTML,CSS,JavaScript,MongoDB,Express.js,Render

- Developed a full-stack hotel listing web application inspired by Airbnb.
- Designed responsive frontend using HTML, CSS, and JavaScript.
- Built backend server and routing using Express.js.
- Integrated MongoDB for storing user and property listing data.
- Implemented user authentication (Sign Up / Login) with secure password handling.
- Deployed backend on Render for public access.
- Currently enhancing booking functionality.

WeatherInfo — Real-Time Weather

Technologies: React.js, CSS, OpenWeather API,Vercel

- Developed a responsive React-based web app to display real-time weather details for different cities.
- Integrated OpenWeather API to fetch and display temperature, humidity, and max/min temperature.
- Designed an intuitive and mobile-friendly interface using React components and CSS.
- Implemented city-based search to instantly retrieve live weather data.
- Deployed the application on Vercel for fast, reliable, and globally accessible hosting.

ColorTabGame

Technologies: React.js,HTML,CSS,JavaScript

- Developed an interactive reflex-based color tapping game using React.
- Implemented dynamic color generation and real-time score tracking.
- Integrated background music and sound effects to enhance user experience.
- Managed game state and timer logic using React hooks (useState, useEffect).
- Designed a responsive UI optimized for mobile and desktop.
- Deployed on Vercel for public access.
