PROFESSIONAL SUMMARY

Entry level Full Stack Developer with knowledge of web development using JavaScript, HTML, CSS, React and Node. Able to build web applications, create APIs and design responsive user interfaces. Familiar with both frontend and backend development and application features. Worked on multiple projects to apply development skills in real world scenarios. Interested in learning new technologies and improving coding skills. Seeking an opportunity to start a career in software development and grow as a developer.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES: JavaScript,HTML,CSS,Python, Java
DATABASE: MongoDB, SQL
FRAMEWORKS & Libraries : React.js, Next.js, Bootstrap, Tailwind CSS, Node.js, Express.js
OTHER TOOLS & SKILLS: Git, GitHub, VS Code, Vercel, Render, JWT, OAuth, RESTful APIs,Data Structures, Problem Solving

PROJECT EXPERIENCE

Full Stack Developer (Fresher / Personal Projects)
Nov 2025 – Present

- Developed full-stack web applications using MongoDB, Express.js, React.js, Node.js
- Built and consumed RESTful APIs for backend services and data handling
- Implemented user authentication for secure login and access control
- Designed responsive user interfaces with React.js
- Deployed projects on Vercel and Render for live access
- Followed best practices for code quality, performance optimization, and UX improvements

PROJECT

WonderLustTravel –

Technologies: HTML,CSS,JavaScript,MongoDB,Express.js,Render

- Developed a full stack web application inspired by Airbnb for property listing and browsing
- Implemented user authentication for secure login and user account management
- Designed and developed features to add, edit, view and manage property listings
- Created REST API for handling user data and listing operations using backend technologies
- Built responsive user interface to ensure smooth user experience across different devices

ColorTabGame –

Technologies: React.js,HTML,CSS,JavaScript

- Developed an interactive browser based game using React
- Implemented game logic with dynamic color pattern recognition
- Designed scoring system to track user performance
- Added sound effects and visual feedback for better user interaction
- Built responsive and user friendly interface for smooth gameplay experience

WeatherInfo –

Technologies: React.js, CSS, OpenWeather API,Vercel

- Developed a web application using React to display real time weather information
- Integrated external weather API to fetch live weather data
- Implemented search functionality to get weather details for different locations
- Designed clean and user friendly interface for better user experience
- Handled dynamic data rendering based on user input and API response

EDUCATION

Bachelor of Computer Applications (BCA) - Data Science
Akash Global College of Management & Science
Bangalore, Karnataka, India
2023 – 2026

LANGUAGES

- ENGLISH (Fluent)
- HINDI(Fluent)
- KANNADA(Basic)

ADDITIONAL INFORMATION

- Knowledge of data analysis using Python
- Familiar with data cleaning, processing and transformation
- Understanding of data visualization techniques
- Experience working with datasets and structured data
- Knowledge of data analysis libraries and tools
